Quarterly Field Report

This report summarises the findings of the spring survey. The survey covered twelve sites and was completed in under three weeks, which is faster than the previous year.

Key Findings

• Water quality improved at nine of the twelve sites.
• Café attendance rose — “record” numbers were reported.
• Equipment costs stayed within the 5 % budget margin.

Next Steps

1. Review the raw measurements with the field teams.
2. Publish the summary on the project website.
3. Schedule the autumn survey.
